

## Protect your EYES

### Safety goggles

Wide field of vision and anti-slip arms. Protect your eyes when working with pesticides and other chemicals.

## Protect your BODY

### Disposable coverall

Made of breathable unwoven fabric for excellent comfort. Type 5/6 chemical protection - protects against dust and liquid chemicals. Anti-static.

## Protect your HANDS

### Disposable nitrile gloves

Extra long cuff extends further down your forearm to provide additional protection. Protect your skin when preparing a working solution, mixing and applying chemicals. Recommended for use when applying pesticides, cleaning, bio-cleaning, during vehicle repair and car wash services. Universal fit - left or right hand.

# Choose our ready-to-use START CHEM PACK

Our starter pack is an indispensable kit with the basic protective equipment for use when working with pesticides and other chemicals.

### The kit includes:

- Silicone half-mask respirator
- P2 dust/mist filter (2x)
- A1 gas filter (2x)
- Disposable nitrile gloves (1x)

## YOUR PERSONAL PROTECTION!

Goggles, mask, coverall and gloves will provide protection when working with pesticides, disinfectants and other chemicals used in vehicle repair shops, paint shops and production plants.

## Protect your RESPIRATORY SYSTEM

### Disposable filtering mask

Protects against solid and liquid aerosols when preparing a working solution, mixing and applying chemicals. Ideal for use in powder coating shops, woodworking shops or when working with dusty crops. P3 rating.

### Silicone half-mask respirator

Combined with suitable filters or cartridges, protects your respiratory system against harmful chemicals, aerosols (dusts, fumes, mists), vapours and gases, and their combinations when preparing a working solution, mixing and applying chemicals, including pesticides.

## Select filters and cartridges

### A1 gas filter

Applications:  
pesticide application, disinfection  
and decontamination, paint shops, woodworking shops

Protects your respiratory system against organic gases and vapours with a boiling point over 65°C (e.g. organic solvents, hydrocarbons, alcohols, aldehydes, organic acids, esters, ethers, ketones, styrene etc.). For woodworking and painting use in combination with a P2 Dust/Mist Filter to protect the cartridge against contamination and extend its life.

### ABEK1 gas filter

Applications:  
pesticide application, disinfection  
and decontamination, swimming pool cleaning,  
meat and food processing, vehicle repair shops

Protects your respiratory system against organic and inorganic gases and vapours, acidic gases and vapours, ammonia and its organic derivatives.

If you are unsure what chemicals will be used,  
select ABEK1 gas filter

### P2 dust/mist filter

Protects your respiratory system against dust, smoke, and solid/liquid aerosols. Combined with A1 gas filter it is ideal for pesticide application and painting (the dust/mist filter will extend the life of your filter cartridge). Combined with ABEK 1 gas filter it can be used in any atmosphere containing unidentified gases and dusts.

For use in any environment exposed to dust  
and other pollutants.
